PRESS RELEASE

LANDSCAPEPLUS SAYS NO TO 0870 AND LAUNCHES A NEW HELPLINE NUMBER OF 01285 832100

Landscapeplus, the UK's leading trade supplier of garden lighting, irrigation and pond products, says it is time to change from an 0870 telephone number, to save contractors on their telephone and mobile call costs.

Over the last 9 years, Landscapeplus has established itself as the UK wide market leader at supplying landscape contractors, garden designers and electricians with a broad range of professional products and systems for garden lighting, irrigation and ponds.

In an effort to have an easy to remember national telephone number Landscapeplus originally went for 0870. At the time this did not cost more than a standard national UK call and Landscapeplus did not make any money from incoming calls to the number.

However, Landscapeplus is aware that rule changes for 0870 numbers over the years have lead to the perception that this is an income generating ploy. General Manager, Alasdair Crawford, stated

"Landscapeplus has NEVER made money from their 0870 number but the time has come to change.

Many of our customers are busy contractors calling from their mobiles on site and an 0870 number does not usually fit in with mobile call plans – so we have launched the new number for our Helpline of 01285 832100, as the most cost effective way for our customers to place orders and get the help and support we provide."

The Landscapeplus Helpline number is 01285 832100 with immediate effect and the Faxline is now 01285 832101 – of course the team can also still be reached through help@landscapeplus.com
